R.C.A.F. HEADQUARTERS at Churchill is pictured here. It was from the building with tower at site that all rescue operations started recently to save the 13 men stranded on the ice in Hudson Bay where a Dakota plane crash landed.—S.N.S. photo.

CRASHED MERCY PLANE ON HUDSON BAY ICEFIELD—The above picture shows the R.C.A.F. Dakota plane, used in an effort to rescue Harold Dunne, radio operator at the lonely Arctic Bay of Radin, lying on the ice and snow of the Hudson Bay. The plane was

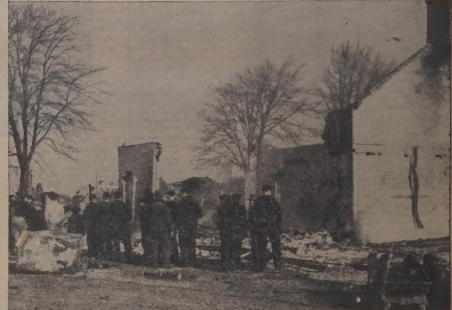

damaged as that extrating is not expected to be possible and will be allowed to sink into the water as the summer draws near.—S.N.S. photo.

GIRL WOUNDED—Wounded in the leg by a bullet from a gun fired by a crowd at shooting practice in Oak College institute, in Ontario, Dawn McCormick, 14, is seen in hospital where her nurse, Mrs. George Irving, is examining bandage. She was in girls' cloakroom when she was wounded. The girls' cloakroom is directly behind the target and its door opens into the target range. The bullet had passed through the door into the cloakroom.—S.N.S. photo.

MERCY FLIGHT PRINCIPAL REUNITED WITH WIFE—Rescued in Winnipeg hospital, Harold Dunne, radio operator who was one of the principal figures in dramatic R.C.A.F. mercy flight and rescue, and Mrs. Dunne are shown here. Reunion was joyous one, tempered though by Dunne's illness.—S.N.S. photo.

TRUCK SMASHES ROADHOUSE—Bachelorette, 22, trapped in the flaming cab of his 1934 truck, when it went off No. 2 highway near London, Ont., and crashed into a roadhouse, was burned to death with wounds too serious to reach him. This is a general scene of the wreckage caused when the vehicle crashed into the building. The truck is said to have blown a tire at a turn in the highway.—S.N.S. photo.

HUSBAND OF ARLINE JUDGE IS UNEMPLOYED—Arline Judge, who got a \$10,000 divorce, present a year ago untrapped a wedding present in New York from her father-in-law recently. It was a more transferring George Rose, whom she married recently in Fort Lee, N.J., to the last of the unemployed. Papa Rose, president of the Rose Underwriters, hosted Arline's recent night out of his lush job as a company vice-president. With young Rose Jordan, the Rose were entertaining visitors. Most the dinner to cater at their Fifth Ave. apartment. They met in above Plaza Nord, George Rose are toasting the bride Arline.—S.N.S. photo.

VICTIM OF INFLUENZA OUT-BREAK—Victim of influenza outbreak in the new district, Earl Douglas Johnson, 17, junior young man, died after a short illness. Second death from influenza was that of a three-year-old child, in the only 14 hours. Dr. J. R. Gentry, M.O.H., issued a warning to all persons to exercise extreme caution. Hundreds of cases of influenza have been reported, he says.—S.N.S. photo.

"NEW LOOK" HAIR DO—The only change in Barbara Ann Scott is her hair-do. And the hair-do has gone definitely New-Look, upsway and sleek. Barbara Ann has more poise, more confidence and a new aura about her, but she's still as friendly as a pup and as happy-go-lucky as a nippet in pigtails. "They tried to make a glamour girl of me," she said, "and it just didn't work. I'm no glamour girl"—S.N.S. photo.

CELEBRATE RUSSIA'S INDEPENDENCE—Members of the diplomatic corps in Delhi, India, join in celebrating the first Independence Day anniversary of the Soviet, offshoot state of Burma. Shown at the reception (left to right), are the wife of the first secretary of the Soviet embassy, U.S.-Soviet-Russia, Burma's Quares d'Ac, farces in India, India's Governor-General Sir Rajagopalachari and General Cariappa, commander-in-chief of the Indian army.—S.N.S. photo.

MAKES RECORD BREAKING LIGHT PLANE HOPE—Captain Bill Odum, famed round-the-world flier, waves a cheerful hello after landing at Oakland, Cal., at the end of a record breaking light plane flight from Honolulu. Preceded by head winds and icy conditions from completing his originally projected non-stop flight from Hawaii to Tokyo, Odum, N.J., Odum covered approximately 2,400 miles across the Pacific in slightly more than 25 hours. He made the trip in a standard model Beechcraft "Bonanza" plane with auxiliary wing-tip tanks. The plane ordinarily has a range of about 700 miles.—S.N.S. photo.

MANITOBA VILLAGE FREED BY SNOWFLOWS—Snowbound for more than a month, the Manitowish village of Wapogo was finally reached by government snowplows. Youngsters like Terence Ames, five, had lots of fun getting around with snowshoes. Ready to go home

when the snowplow arrived were Mr. and Mrs. William Staak who were visiting the village from Saskatchewan when they and others were imprisoned by lowering drifts. They had their luggage ready and are putting it on sleigh.—S.N.S. photo.

George Perry, eight, a little fellow with a large shovel, helps his father clear out drifts. Snowplow arrived just as end of winter was limited and food short. Heavy snow has been falling since early December.—S.N.S. photo.

WORLD HAPPENINGS

BRIEFLY TOLD

At the end of 1948, 82,000 Britons had returned to their homes, an increase of 10,000 over November.

New dwelling units completed in Canada during the first 11 months of 1948 totaled 68,000, the bureau of statistics reported.

The Indian government plans to get up factories for the manufacture of paper, pulp, cotton, synthetic ammonia and petroleum.

A British Overseas Airways plane was shot down 2,000 miles north of Montreal, N.B., to London in a recent crash landing.

Munich Radio, controlled since the war's end by the United States military government, has been turned over to German management.

A recent bylaw amendment makes it illegal for pedestrians in Vancouver to cross in front of standing buses at corners where there is no traffic control.

King George VI has approved the appointment of the Duke of Gloucester as lord high commissioner to the general assembly of the Church of Scotland.

Displacement of a woodland Caribou game preserve in the Patricia district near the Manitoba boundary was recently announced by the Ontario government.

KITCHEN MEDITATIONS

"That's Sam"

By JANE DALE

Sam is quite a man, a professional fellow. He's no danger of his woman's suit—'till he grows old and settles down. He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

I'll fix the hole in the collar when it rains.

When you find I've not lost my wits, you know.

Sam is not lazy, he just takes work as it comes.

Everything will get done in its order when the time comes.

He never does a thing today that he can do tomorrow.

So Sarah, his long suffering wife knows to her sorrow.

I'll be the batch on the pantry shelf, you say.

To Seek Medical Aid Crawled Three Miles

WILLIAM McDONALD, Toronto accountant, crawled three miles on his hands and knees in below-zero weather to obtain help. He had smashed his ankle when a jack he was using in fixing his car, had slipped and struck him, the daily resident home of Mr. and Mrs. Ernest Evans, of Thompson, Ont., who are shown here. An accountant, who works around Saint St. Marie, Ont. Mr. McDonald tried to get chain on wheels of his car, which had stuck in snow. He jacked up car but jack slipped and broke his ankle. Norman and Ruby Evans point to their house after desperate struggle through snow in effort to find doctor. McDonald's hands, feet and legs were frozen.

Handicapped Hurler Offers Service Cheap

WASHINGTON.—A one-legged fellow is so certain that he can be a top-flight baseball pitcher he is willing to sign a contract for \$1 a year. There are a couple of catches to this offer of Bert Shogren.

He wants to be with a triple-A baseball club, and he wants to be regular, pitching every fifth day.

Then every game he wins he'd be entitled to \$400. He figured he'd be collecting a lot of money.

Shogren lost his right leg below the knee when he was shot down over Germany five years ago.

Since then he has been hampered with major injuries, pitched exhibition games and coached for the Washington Senators.

To Find Right — Not Right

HEALTH Public Awareness Of Heart Disease

"Each of us is a candidate for one of the several diseases of the heart and blood vessels that take a heavy annual toll of lives," declares Dr. Harold W. Hargill of the Canadian Heart Association.

In a National Health Week message, Dr. Hargill pointed out that although advances in medical science have increased life expectancy very sharply during the past 50 years little is yet known about the causes of rheumatic fever, high blood pressure and arteriosclerosis. There is an encouraging aspect, however, "enough is known about them to permit some control of the ravages they cause and indicate the paths of search for further knowledge."

As with all serious health problems, it is important that the public be made aware of the facts. The American Heart Association is now conducting the first public campaign of education on a national scale—campaign from which Canadians will benefit through press, magazine and radio.

Although established only a year ago, the Canadian association hopes to develop an intensive educational program along similar lines. The fact that people are living longer than their ancestors makes them targets for high blood pressure, arteriosclerosis and the late effects of rheumatic fever in youth. These conditions usually make themselves apparent between 40 and 50 years of age.

Dr. Hargill points out that while each of us is a candidate for one of these diseases, it is not in the least business to contribute to wards prevention and relief of this disease of the heart and blood vessels.

He is sure that "people everywhere will soon become sufficiently aware of the problem to call for more action from those who should lead the way." Dr. Hargill points to the fact that the green made in the fight against arteriosclerosis in the last 50 years, and states that, with respect to public interest and action, heart disease is now where tuberculosis was 50 years ago.

Farmers To Benefit From Surplus Seed

REGINA.—Because of a surplus of registered seed, Canadian farmers this year are being offered a bargain in better bush beans and peas. The surplus was created by an unexpected drop in the registered price of seed, not because the overseas buyers had all the registered he desired but chiefly because of his lack of foreign exchange.

In using the surplus down to proper level, registered seeds of many kinds and varieties are now being offered at bargain prices, the Canadian Seed Growers' association is conducting a campaign to acquaint farmers with the value of registered seed.

Apart from that, registered seed itself is an interesting story and one worth the time of the farmer who knows that he will be able to improve quality of his cattle, sheep, pigs, poultry, he must use pedigree stock.

It is exactly the same story with seed.

What the professional plant breeder introduced in the way of new seed is being used by the foundation stock. These small handfuls of foundation seeds are multiplied by a few highly experienced members of the Canadian Seed Growers' association.

Progeny of foundation stock is sold to registered members of the association and every year they on their associated sites seed grows to seed for the next year.

May Set Up Television Stations

OTTAWA.—Prime Minister St. Laurent said in the Commons that the federal government had been studying the possibility of establishing new television stations in Canada immediately.

He said the government is considering the possibility of setting up some stations which would not interfere with any long-range policy on television.

Speaking during debate on the three-point policy, he indicated that the short-term policy will not be laid down until a royal commission on radio, television, films and the like makes recommendations to the government.

Establishment of the commission was forecast in the throne speech.

Mr. St. Laurent said that television would not develop into a monopoly of a few big companies.

If the frequency was turned over to private enterprise, he said, interests would have a vested interest in the maintenance of the status quo.

He said the frequency allocated to Canada for the public.

New Method Of Dehorning Cattle

Blockheads have long looked for a simple and humane method of stopping horns from growing. But a method has now been claimed to be produced in a laboratory in the United States and used with satisfactory results.

The new solution, called "Pol", is a mixture of antibiotic tetracycline, polycydic acid and dental collagen, and is as simple to use as finger nail polish. The Pol is done when the calf is 3 to 10 days old. The hair is clipped around the horn area and the solution applied to the horn button with a small brush. The solution is rubbed in immediately and the solution immediately sets.

THE PLACE TO START

Communism is the flash point in the world today. People ask: "Is there an answer to this mighty ideology of materialism?" Many try to "appease" it. Others try to "fight" it by another materialism like Fascism, or just opposing it with force. But anti-Communism is no answer. For it cannot touch either the wrongs or the resentments which give Communism its birth and its power.

Communism is more than an economic and political program. Like all ideologies, it is a way of life issuing in national and world change. So the only possible answer to materialistic ideologies is an inspired ideology which is more compelling, more universal and more satisfying.

A colorful figure at the World Assembly for Moral Re-Armament at Caux, Switzerland, was Fred Copeman, former member of the Central Committee of the British Communist party, who went to Moscow as a delegate to the Comintern in the days when Tito, Togliatti, Dimitroff and the others sat together in Moscow. Copeman said: "To answer a force as strong and with roots as deep as the Communist party, it is necessary to have a belief in a power greater than human nature."

At Caux, Copeman found that force stronger than human nature operating in the lives of men and nations. Men of every party, race and point of view, were united in the experience that their own nature could be radically changed, and that God could guide them in their personal, social, and national lives and decisions.

Said Fred Copeman: "I was a Communist for a long time and an important one. The Communist believes in all the moral laws for somebody else. When the time comes for him to put them into practice, Communism fails." He continued: "I have given everything three times in my life and on each occasion found that the bottom was not in the bucket. Moral Re-Armament is to me a belief to which I can give everything. I am certain that I can give everything—mainly because for the first time in my life I am starting in the right place—with myself!"

Local and District

Claud Heidt returned from the coast recently.

Delia Curling Club's Ladies' Open Bungalow will be held on Friday and Saturday of this week.

George See, local transfer man, is among those suffering from the prevailing influenza.

Born at Drumheller hospital, on Saturday, February 12, 1949, to Mr. and Mrs. S. M. Thompson, Jr., a daughter.

Dave Pearson, of Gibson Motors, attended the Ford School of Mechanics, held in Calgary from Jan. 31st to Feb. 4th.

Joe Cousens, who has been under treatment at Drumheller hospital, returned to his home on Sunday.

A short break in the severe weather, occurring on Thursday morning last, was followed by the first blizzard of the winter in the afternoon, continuing on through Friday. While not a great deal of snow fell, the force of the wind caused much drifting. At present, a bitter northeast wind is causing drifting.

The Council of the M. D. of Starland having passed and forwarded to Hon. Dr. W. W. Cross, Minister of Health, a resolution recommending "that the Drumheller Health Unit arrange for a Public Health Nurse to be stationed in Delia," taxpayers and others who wish to support this resolution are invited to sign the petitions to be sent to the Minister, which can be found at the

office of Mrs. C. A. Hudgeon; also at Gibson Motors and at the D. H. Campbell store.

Sunbeam News

Mr. and Mrs. Bob Hoy and family, of Munson, moved out to Mrs. David Smeal's farm on Monday last, having recently purchased this property.

Gifford Chambers, who has spent the past couple of months at the home of his brother, Clifton, left for his home in Okotoks Valley, in the Peace River district, on Monday last.

Mr. and Mrs. Wm. Campbell and daughter Marjorie, returned from their trip to Los Angeles recently.

Barry Galbraith, of Calgary, was a business visitor at the Brewitt home last Wednesday.

Mr. and Mrs. Alex. Dick and little Carol, were guests at the home of Mr. and Mrs. D. J. Waters on Wednesday last.

The February meeting of the Sunbeam W.M.S. was held at the home of Mrs. Art Nelson on Thursday afternoon, with only a small percentage of members present, owing to the inclement weather.

Ray Barker returned from Turner Valley last Monday.

Mrs. David Smeal, of Calgary, was a guest at the Pontifex home last week.

Mr. and Mrs. Bert Parry and family, of Morris, were guests at the home of Mr. and Mrs. George Cosens on Sunday last.

Mrs. Christina Smith returned from Olds on Thursday morning's bus.

Bert Holland was taken to a hospital in Edmonton on Friday, February 4th, where he will receive treatment for several weeks.

Calgary visitors during the week were: Mr. Walter Pontifex, Mrs. Harold Trentham, and Mr. and Mrs. Henry Birkheim.

The worst blizzard of the season swept over this district on Thursday afternoon and all day Friday. Roads were completely blocked, and many were stranded from home. The bus, with eight passengers, was stalled at Nelson's corner. They were given refreshments and driven to Michiel through the blinding storm—a distance of five miles—by two cars operated by Alex. Dick and Ray Nelson. This trip took five hours. The bus was pulled to Nelson's Friday forenoon with a tractor, where it was replenished with fuel, etc., and remained there until Saturday evening, when the snow plough went through and the two bus drivers, Dale Woodner and Harold Zeilek, proceeded on their way to Calgary.

Minutes M.D. Council of Starland, No. 47

NATIONAL Reduces 2,4-D Prices

In keeping with our policy of being the first to take major steps in the field of Chemical Weed Control, National Grain announces reduced 2,4-D prices.

Effective immediately NATIONAL AMINE "80" will be reduced in price \$1.50 per gallon. NATIONAL ESTER "44" will be reduced \$2.00 per gallon.

This price reduction will be made without reducing quality in any way. Each gallon of NATIONAL AMINE "80" will still contain a full 80 ounces of 2,4-D acid equivalent and "NATIONAL ESTER" 44 ounces 2,4-D acid equivalent. The cost of Chemical Weed Control using National Chemicals will be materially lowered by this price reduction.

National Grain handle a complete line of Agricultural Chemicals. Spraying and Dusting Equipment. Contact your local National Elevator Manager, appointed dealer or write direct for full information.

Good Seed Produces ...A BETTER CROP

This sterling advice is as old as the history of agriculture. Throughout the ages agricultural authorities have noted that to obtain a good crop, good seed must be used. The very best seed obtainable is REGISTERED SEED produced under the stringent rules, regulations and supervision of the Canadian Seed Growers' Association and of the Dominion Plant Products Division. REGISTERED SEED is guaranteed for truthness-to-variety, to be of high germination and to contain the very minimum of impurities.

A few bushels of Registered seed sown on clean land is an investment that will certainly bring to any farmer, HIGHER YIELDS and HIGHER GRADES. Barley in particular is a crop with which there is room for a good deal of improvement which can easily be brought about by the use of Registered seed.
